

SCHOLARSHIP RECIPIENTS

Ruby Briand

Baillieboro, ON

Scholarship Received

Friends of Canadian Simmental Foundation Scholarship
Valued at \$3000

Current Education

Queens University

Program

Bachelor of Science, Nursing

I grew up in Baillieboro, Ontario where my family owns and operates Evergreen Farm. We run a herd of purebred Simmental and Simmental cross cattle. I am 18 years old and I am currently in my first year of a Bachelor of Science in Nursing at Queen's University. I grew up exhibiting Simmental cattle through 4-H where I had the opportunity to show at various local, provincial, and national shows. I am very thankful for the opportunities that being involved with the Simmental breed has brought me. The agriculture industry has undoubtedly helped shape me into the person I am today. I look forward to giving back to youth and women in agriculture in a similar way it has supported me growing up. I extend my utmost gratitude to the Friends of Canadian Simmental Foundation for awarding me with the Friends of Canadian Simmental Foundation Scholarship.

Jackson Goudy

Stoughton, SK

Scholarship Received

Friends of Canadian Simmental Foundation Scholarship
Valued at \$3000

Current Education

Western College of Veterinary Medicine

Program

Veterinary Medicine

My name is Jackson Goudy, and I am in my third year of veterinary medicine at the Western College of Veterinary Medicine. I grew up on a mixed cattle and grain farm in Southeast Saskatchewan near Stoughton. Growing up in a small community I was extensively involved in 4-H for fourteen years and various sports. I started a small purebred and commercial cow herd from a young age that has grown over the years. I started my journey away from home in 2019 when I attended the College of Agriculture before getting into vet med. Once I was accepted into veterinary medicine, I was on track to graduate vet school in 2025 and continue my plans of becoming a large animal veterinarian, with hopes of one day specializing in bovine reproduction.

Jordynn Rogers

Drayton Valley, AB

Scholarship Received

Friends of Canadian Simmental Foundation Scholarship
Valued at \$3000

Current Education

MacEwan University

Program

Bachelor of Arts

I am from Drayton Valley where my sisters and I are slowly growing our own purebred herds while helping our parents with our commercial herd of Simmental X cattle. I have loved every opportunity that the agriculture industry has given me. Being in Edmonton for school, I miss this aspect of my life and take every opportunity to go back, help, and visit the farm at home. That said, I am in my second year at MacEwan University working towards a Bachelor of Arts, with the end goal of becoming an elementary school teacher.

Carmen Wolfe

Sundre, AB

Scholarship Received

Friends of Canadian Simmental Foundation Scholarship
Valued at \$3000

Current Education

University of British Columbia

Program

Bachelor of Kinesiology

Carmen is in her fourth year of obtaining her Bachelor of Kinesiology at the University of British Columbia. Upon graduation, Carmen plans to attend Physiotherapy school where she hopes to focus on supporting and rehabilitating physical injuries within the farming community. Carmen's connection to the Canadian Simmental Association is multi-generational with her parents Shane and Shannon Wolfe of Wolfe's Fleckvieh (Sundre, AB) and grandparents John and Sue Wolfe previously of Jack Pine Simmentals (Peers, AB). The cattle industry has always been a big part of Carmen's life. She grew up in a 4-H family, was actively involved in her family's Fleckvieh operation (including owning her own cattle) and has many extended family members and friends who are cattle producers. Carmen would like to give an extensive thanks to the Friends and Family of the Canadian Simmental Foundation for selecting her for the 2023 Scholarship and supporting her academic journey.

Danica Davis

Keene, ON

Scholarship Received

Trevor Vance - First Year Scholarship
Valued at \$3000

Current Education

University of Prince Edward Island

Program

Honors BSs Biology (Pre-Vet)

I am in my first year of university at UPEI studying to complete a Bachelor of Science in Biology with a specialization of Life Sciences. I am proud to have been raised alongside my twin brothers on a farm in the small town of Keene Ontario.

Being part of the sixth generation on the family farm has empowered me to build a strong work ethic and a desire to always strive for my best. This determination is present in everything I am involved in, from athletics, 4H, academics, showing cattle and being on the farm. It is through community, participation in various 4 H clubs and being a part of the Simmental Association that I developed a desire to work toward veterinarian medicine. I hope to use my degree to improve the agriculture industry and promote animal health in rural communities.
